EXPERIENCE

COMPANY **Webdeveloper - Dafon**

I currently work with my company as a freelancer, learning new ways to create and negotiate technology projects. I mainly work with integrations, e-commerce, and MVP software development

Fullstack Java Angular Engineer Mid Level - Canadian Equiplano Volaris Group

I worked at Equiplano, a company focused on public management systems spread across various cities in southern Brazil in the state of Paraná.

Java Software Engineer - MzTech

I was responsible for gathering requirements, modeling and developing the Back End, creating and maintaining the technical infrastructure to ensure that the applications function correctly, ensuring that all data is stored and managed correctly and that the necessary functionalities are available to end users.

Developer Back-end - WLabs

I worked at a São Paulo-based startup focused on creating software similar to Uber that was designed to be used in 24-hour machines similar to 24-hour ATMs in the United States. This system involved 3D mapping issues via maps of passenger locations, management of railroad, road, air, and sea tickets.

EDUCATION

Bachelor's degree in Information Systems.

Juiz de Fora - Minas Gerais

Certifications

Scrum Fundamentals Certified

LANGUAGES

Inglês:	advanced	Espanhol:	advanced	Português:	native
